

Arun Raghupathi

Cloud Engineer / Inventory and Electronics maintenance Associate

✉ rarun1196@gmail.com ☎ +91-6382033923 🌐 linkedin.com/in/arun-r-1173aa170

SUMMARY

Experienced Inventory and Electronics Maintenance Associate with expertise in inventory control, electronic repair, and ERP-based stock management and reporting. Skilled in AWS Cloud Services, Linux Administration, and DevOps fundamentals, including cloud computing, server management, system monitoring, deployment support, and basic networking. Knowledgeable in troubleshooting hardware and software issues, maintaining system performance, and supporting IT infrastructure operations.

TECHNICAL SKILLS

Cloud Technologies — AWS Cloud Services | Cloud Monitoring | Cloud Deployment | AWS Networking (VPC) | Cloud Storage Services (S3, EBS) | IAM & Access Management

DevOps Tools — Git & GitHub | Docker | Kubernetes | Jenkins | Ansible | CI/CD Pipelines

Platforms — Linux Administration | ERP Integration & Support

Operating Systems — Linux (Ubuntu)

soft skill — System Monitoring & Troubleshooting | User & Permission Management | Basic Shell Scripting | Server Configuration & Maintenance

EDUCATION

B.E Electronic and Communication Engineering
Loyola-Icam College of Engineering

07/2016 – 05/2019
Nungabakkam, Chennai

COURSES

- AWS Cloud Fundamentals Training
- Linux Administration Training
- DevOps fundamentals Trainng
- Erp integration

PROFESSIONAL EXPERIENCE

Zebronics India pvt ltd

01/2025 – Present

Inventory Maintenace and Electronic Management Associate

- Handled customer complaints professionally and provided quick solutions.
- Maintained stock levels and monitored inventory movement regularly.
- Assisted customers with product inquiries, services, and issue resolution.

Junior Engineer | Onsite engineer

11/2021 – 12/2024

- Provided service and support for electronic products.
- Diagnosed PCBA board issues and replaced components.
- Visited customer locations to resolve issues.
- Supported the team in stock maintenance and inventory handling.

Production Department

09/2020 – 10/2021

- To assembly and packaging of electronic products.
- Performed quality checking to ensure product standards and functionality.
- Supported daily production operations and ensured timely completion of tasks.

PROJECTS

Dynamic Website Hosting with Auto Scaling and Load Balancing (AWS)

- Designed and deployed a scalable web application on AWS using EC2, Auto Scaling, and Elastic Load Balancer.
- Configured Elastic Load Balancer to distribute traffic across multiple EC2 instances for high availability.
- Implemented Auto Scaling policies to automatically increase or decrease resources based on system load.
- Hosted the application in a secure VPC environment to ensure reliability and fault tolerance.
- Enhanced application performance, scalability, and uptime using AWS cloud best practices

Automatic information system health

- Developed a Linux-based Log Analyzer Tool on Ubuntu using Shell Scripting to monitor system logs and detect security-related events.
- Automated log analysis using Cron Jobs for scheduled execution without manual intervention.
- Created Bash scripts to display overall system health information including CPU, memory, disk usage, and running services.
- Improved system monitoring and troubleshooting efficiency through automation and real-time log analysis.

Smart Home Power Management System

- Built a Smart Home Power Management System using Arduino and sensors.
- Monitored real-time power consumption of home appliances.
- Controlled electrical devices automatically based on energy usage.
- Integrated sensors, relays, and Arduino for smart energy management.
- Tested and maintained electronic circuits and system performance.

ACHIEVEMENT

- Reduced inventory discrepancies by 30% through accurate ERP tracking and routine audits.
- Repaired and maintained over 95% of electronic devices, improving operational uptime.
- Implemented preventive maintenance plans, lowering equipment failure rates by 20%.

PASSIONS & INTERESTS

- Passionate about Cloud Architecture, DevOps Automation, and Infrastructure as Code (IaC) using AWS, Terraform, Jenkins, and Kubernetes.
- Enthusiastic learner focused on continuous integration, deployment, and cloud scalability best practices.
- Dedicated to building highly available, secure, and automated cloud environments that solve real-world challenges.
- Committed to continuous learning, certification, and professional development in Cloud, DevOps, and Automation.
